

Grakon, LLC Receives PACCAR Quality Achievement Award

Grakon, LLC announced today they received PACCAR's prestigious "2009 Quality Achievement Award" for achieving 50 PPM or better quality levels. PACCAR's requirement of 50 PPM consists of maintaining non-conforming parts (NCP) at a rate of less than 50 PPM (parts per million) sold from its suppliers. Grakon, LLC has received this award for the past four years and is committed to continually setting this level of excellence in the future.

"We, at Grakon, are quite proud PACCAR's recognition for our sub-50 PPM performance because we pride ourselves in working smart to achieve those results. Our pre-launch, PPM mean-shift and Quality Roadmap processes are all designed to protect our customers from defects," said, Tony Pashigian, Vice President of Business Development. "Grakon has been a preferred supplier to PACCAR for over 30 years. We currently supply hundreds of active part numbers to PACCAR and we look forward to a continued partnership of supplying high quality parts and exceeding their increasing expectations."

Grakon is a leading designer and manufacturer of custom interior lighting, exterior lighting, complex engineered and assembled molded trim components as well custom trim features such as nameplates and thresholds. Grakon has been designing and manufacturing LED lighting for more than 10 years. Most recently we have developed a strong focus in customizing the efficient use of LED lighting technology and are the leader in the heavy truck industry. Grakon supplies all major OEM's production and tiered assembly locations throughout the Americas, Europe and Asia.
